SUMMARY

Self-driven AI & Data Science enthusiast with hands-on experience in **Python, SQL, Machine Learning, Deep learning, LLMs, and RAG Systems**. Completed a real-world **AI internship** building intelligent automation solutions. Seeking roles in **Data Science and ML Engineering**.

EDUCATION

Arya College of Engineering and IT, Jaipur
B.Tech in Electronics and Communication Engineering
Small Wonders Academy, Jaipur (RBSE)
Senior Secondary (Mathematics)

2022 – 2026
CGPA: 8.0 / 10
93.80%

EXPERIENCE

AI Intern – Winter AI Internship 2026

Jan 2026 – Feb 2026

Mirai School of Technology

Remote

- Built **6+ production-style AI and automation systems** in a 4-week sprint using **n8n** and **LLM-driven logic** including business workflow automations (form processing, structured data logging, confirmation emails), an **AI calendar agent** for natural-language scheduling and conflict resolution, and a **Telegram appointment bot** for conversational bookings.
- Designed AI-powered developer portfolio and content systems, including an **automated contact/response handler** and a **LinkedIn content automation pipeline** that generates and schedules posts using structured prompts, alongside an API-driven workflow for automated daily content delivery.
- Applied **prompt engineering, LLM-based systems, and automation design** across the full internship, strengthening structured problem-solving and turning ambiguous requirements into scalable, real-world AI workflows.

PROJECTS

LearnTrace AI | *Python, Scikit-learn, NumPy, Pandas, RAG, Ollama, Whisper, Embeddings* [\[GitHub\]](#)

July 2026

- Engineered a **GenAI-powered course content retrieval system** that instantly pinpoints the exact lecture, video number, and timestamp for any topic across 100+ hours of course content.
- Implemented **semantic search** with embeddings and cosine similarity to identify the exact lecture, video number, and timestamp for any topic, cutting manual lecture-search time.
- Designed a multi-stage pipeline (transcription → chunking → embeddings → vector search → LLM response) with **local Ollama inference** to deliver source-aware, timestamped answers with near-instant retrieval.

House Price Prediction | *Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn* [\[GitHub\]](#)

May 2026

- Built an end-to-end **ML regression pipeline** on the **California Housing Dataset** (Kaggle) to predict median house prices.
- Performed **data preprocessing**, feature scaling, and EDA; trained **Linear Regression, Random Forest, and Decision Tree** models with RMSE-optimized hyperparameter tuning.
- Visualized **feature importance** and correlation heatmaps using **Seaborn** and **Matplotlib**.

HRFlow AI | *RAG, n8n, Pinecone, OpenAI Embeddings* [\[GitHub\]](#)

January 2026

- Developed an intelligent **RAG-based HR chatbot** that delivers accurate, context-aware answers to employee queries using an organization's HR policies and documents.
- Automated document ingestion from **Google Drive** via **n8n** workflows with 1-minute polling, chunking and embedding HR policy documents into a **Pinecone vector database** in real time.
- Integrated **OpenAI embeddings** and a **GPT-based conversational agent** with memory, reducing employee HR-query resolution time from manual document lookup to under a few seconds.

RELEVANT COURSEWORK

Core CS: Object-Oriented Programming (OOP), Computer Networks (CN), Operating Systems (OS)

TECHNICAL SKILLS

Languages & Data: Python (Proficient), SQL, Java

Data Science Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, Flask, BeautifulSoup, requests

AI & ML: Machine Learning, Deep Learning (Fundamentals), LLMs, RAG, Statistics

Developer Tools: VS Code, Git, GitHub, Jupyter Notebook, Terminal, Google Colab, n8n, Cursor, Claude

Web Technologies: Html, Css, Web Scraping

Soft Skills: Problem Solving, Structured Thinking, Time Management, Public Speaking, Leadership
